Description of the good

According to the information submitted by the importer, the product is a “Wifi Signal Sender” from Tp-link Asia Pacific.

The importer submitted brochure and photo of the product for further information. Based on the brochure information, the Decos work together to form one unified wi-fi network to ensure guaranteed Wi-Fi signal in every corner of the home by eliminating weak signal areas. It acts as a smart access point which works with variety of Zigbee, Bluetooth, Wi-Fi devices. Details of the product is attached.

Goods are classified according to Harmonized System in accordance with the General Interpretative Rules(GIR) and the duty rate is determined according to the Export Import Law 31/79.

މުވާދާގެ ސަރުކާރު
Explanation

The stated product consists of networking nodes that extends Wi-Fi signal for large area. The main purpose of this device is same as an access point and the hub function incorporated is complimentary. Smart access point which extend the Wi-Fi signal to a large area is classifiable in HS subheading 8517.62 as a telecommunication apparatus which allows for the connection to a wired or wireless communication network or the transmission or reception of speech or other sounds, images or other data within such a network.

Since the main function of the product is extending Wi-Fi signal the product cannot be considered as a hub or a router as stipulated in Export Import Law 31/79. Therefore, the applicable HS code for the " AC2200 Smart Home mesh Wi-Fi System " is 8517629099. The rate of duty will be 20% ad valorem.
